EXPERIENCE

Google Software Product Sprint (SPS)

- Participant

February 2020 - May 2020

- Collaborated with a team of peers to design and implement a web application using Java, JavaScript, HTML, and CSS over the course of 10 weeks, leveraging various Google Cloud Platform APIs, including App Engine and Datastore.
- Practiced industry best practices such as: contributing to open-source software using Git and GitHub, conducting code reviews, participating in distributed development, designing new components and interfaces, and leading them to completion.

TRIO Student Support Services CSUSM

- Math Tutor

February 2019 - Current

- Provides TRIO SSS Students with one-on-one tutoring in Intermediate Algebra, College Algebra, Trigonometry, Precalculus, Calculus I.
- Manages daily appointments for tutoring sessions.
- Contribute to non-tutoring related events such as workshop preparations and other activities organized by TRIO SSS.

Center for Research and Engagement in STEM CSUSM

-Volunteer

September 2019 - November 2019

- Guided K-8 students in building STEM-related projects in an after school program organized by the CSUSM CRESE.

SKILLS

Technical

Proficient

C++

Java

Html

CSS

Soft

Communication

Problem Solving

Adaptability

Fluent in both English, French, and Swahili

Familiar

Python

Javascript

SQL

Spring Framework (Java)

PROJECTS

Study Buddy (SPS)

February 2020 - Now

A Java web application for finding study partners.

- Implemented an authentication system using OAuth.
- Implemented a backend logic using Java Servlets and Datastore Query models to handle GET and POST requests.

Cougar Roomie (Course Project)

February 2020 - May 2020

A SpringBoot web application for finding roommates.

- Implemented backend logic that handled the upload and storage of our user's profile images in a PostgreSQL database, using the Spring Data JPA and Thymeleaf.

EDUCATION

California State University-San

Marcos (CSUSM) GPA: 3.65

Bachelor of Science, Software

Engineering

Expected Graduation: June 2022
